Issued: 29.09.2026  
Applies to: Rose Damascena Essential Oil  
Scope: Fragrance allergens, Reg. (EC) No 1223/2009, Annex III  
Status: Approved

**Indicative values.** The values in this document are typical of the product, not the results of a particular batch. For batch-specific documentation and values (certificate of analysis, GC-MS report), contact us at [sales@bioform.bg](mailto:sales@bioform.bg) or +359 889 45 05 50.

## REGULATORY BASIS

|                    |                                                                                                                                                                                                                                                                                                                                                           |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CAS                | 90106-38-0                                                                                                                                                                                                                                                                                                                                                |
| Regulation         | Regulation (EC) No 1223/2009, Annex III, as amended by Commission Regulation (EU) 2023/1545: a listed allergen is named in a finished cosmetic's ingredient list above 0.001 % (leave-on) or 0.01 % (rinse-off). Products that do not meet the amended labelling may be placed on the EU market until 31 July 2026 and made available until 31 July 2028. |
| The product itself | Listed in Annex III as Rosa damascena / alba / canina / centifolia / gallica / moschata / rugosa flower oil and extract: declared as "Rose Flower Oil/Extract" above the same thresholds, in addition to the individual allergens below.                                                                                                                  |

## ALLERGENS IN THIS PRODUCT (TYPICAL CONTENT, %)

| ALLERGEN (INCI)            | CAS       | TYPICAL % | NOTE                                           |
|----------------------------|-----------|-----------|------------------------------------------------|
| Citronellol <sup>[1]</sup> | 106-22-9  | 20–34     | ISO 9842 range; 21.5 in the analysed oil       |
| Geraniol <sup>[1]</sup>    | 106-24-1  | 14–29     | ISO 9842 range 14–22; 28.7 in the analysed oil |
| Farnesol <sup>[1]</sup>    | 4602-84-0 | 2.1       |                                                |
| Eugenol <sup>[1]</sup>     | 97-53-0   | 0.85      |                                                |
| Linalool <sup>[1]</sup>    | 78-70-6   | 0.53      |                                                |
| Limonene <sup>[1]</sup>    | 138-86-3  | 0.05      |                                                |

Other Annex III fragrance allergens were not reported in the cited analyses (full GC-MS profile of one analysed oil, 20 constituents). This is not a guarantee of their absence below the level those analyses report.

## USING THESE VALUES

Allergen in the finished product (%) = typical content in this material (%) × dosage of this material in the formula (%) ÷ 100. Compare it with the thresholds above to decide whether the allergen must be named on the label. Typical values for this compound, not the analysis of a particular batch: a batch-specific allergen report is available on request with the certificate of analysis.
