DOCUMENT CONTROL

Product Specification

Version: 1.1
Issued: 29.09.2026
Applies to: Rosemary Essential Oil
Scope: Commercial specification
Status: Approved

Indicative values. The values in this document are typical of the product, not the results of a particular batch. For batch-specific documentation and values (certificate of analysis, GC-MS report), contact us at sales@bioform.bg or +359 889 45 05 50.

DESCRIPTION

Rosemary essential oil is one of the most widely used aromatics in cosmetics, personal care and food applications, prized for its fresh, invigorating scent and versatile functional properties. Bioform's rosemary oil is steam distilled from *Salvia rosmarinus* cultivated on certified organic land at our own plantations in Bulgaria's Rose Valley, near the village of Tazha. The herb is harvested at the optimal stage of flowering, when the aromatic compounds — including 1,8-cineole, camphor and alpha-pinene — reach peak concentration. Distillation is carried out on-site within hours of harvest to capture the oil's full aromatic complexity and ensure the highest possible quality for demanding industrial buyers.

IDENTITY AND ORIGIN

Botanical Name	Salvia rosmarinus Spenn. (syn. Rosmarinus officinalis L.)	Appearance	Clear to pale yellow liquid
Common Name	Rosemary Oil	Aroma Profile	Fresh, camphoraceous, herbaceous with woody-balsamic undertones
Plant Part	Flowering tops and leaves	CAS Number	8000-25-7
