DOCUMENT CONTROL

Product Specification

Version: 1.1
Issued: 29.09.2026
Applies to: Oregano Essential Oil
Scope: Commercial specification
Status: Approved

Indicative values. The values in this document are typical of the product, not the results of a particular batch. For batch-specific documentation and values (certificate of analysis, GC-MS report), contact us at sales@bioform.bg or +359 889 45 05 50.

DESCRIPTION

Wild oregano essential oil from *Origanum vulgare* is one of the most potent aromatic oils commercially available, valued for its exceptionally high carvacrol content. Bioform's oregano oil is steam distilled from organically cultivated herb grown on our own plantations in Bulgaria's Rose Valley, near the village of Tazha. The herb is harvested at optimal flowering stage to maximise the concentration of phenolic compounds and distilled on-site within hours, preserving the oil's full spectrum of bioactive constituents. Every batch undergoes rigorous GC-MS analysis to verify the chemical composition and ensure consistent quality that meets the demanding requirements of pharmaceutical and food-grade buyers.

IDENTITY AND ORIGIN

Botanical Name	Origanum vulgare L.	Appearance	Yellow to brownish-yellow liquid
Common Name	Wild Oregano Oil, Common Oregano Oil	Aroma Profile	Intense, warm, pungent, herbaceous-spicy with strong carvacrol character
Plant Part	Flowering herb (aerial parts)	CAS Number	8007-11-2
